

Sandbrushed™

RELIEVED WOODGRAIN SHUTTERS

MILLWORK BY
O'Hair

Resembling the smooth sculpted sands of a pristine beach carved by a gentle ocean breeze, O'Hair's **Sandbrushed™** surface accentuates the natural beauty of Real Wood with the added dimension of natural grain contouring.

...a Natural Enhancement

• Contour-to-Grain

Using thousands of cloth-backed strips, the **Sandbrushed™** process removes softer grain between hardwood grain lines, leaving a surface that is contour-to-grain, yet smooth and easy to clean.

• Painted Finishes

Sandbrushed™ shutters may be painted to maintain room light-level, yet the natural beauty of Real Wood comes through.

• Stained Finishes

Stain finishes enhance the beauty of Real Wood grain. Stain finishes applied to **Sandbrushed™** shutters result in even greater contrast and clarity of natural grain lines.

• Special Finishes

Some O'Hair dealers have developed special finishes for **Sandbrushed™** shutters. A "glaze and sand-through" finish (shown at right) results in a "distressed" or "driftwood" look.
